

MAHESH .K

Technical Lead

Email: kagithacm237@gmail.com | **Phone:** +91-8121840719 | **LinkedIn:** <https://www.linkedin.com/in/mahesh-kagitha-503b99a7>

Professional Summary

A seasoned Technical Lead with **over 9.9 years of experience** in full-stack development, specializing in **Golang, React.js, and AngularJS**. Proven expertise in the Software Development Life Cycle (SDLC) and leading projects within **Agile and Scrum** methodologies. Experienced in building scalable, product-based solutions across diverse domains, including finance, healthcare, and e-commerce. Adept at developing robust backend APIs, microservices, and dynamic user interfaces with a consistent focus on writing clean, maintainable, and optimized code.

Technical Skills

Languages & Frameworks: Golang, Gin, React.js, Node.js, Angular, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Python

Version Control: Git

Cloud & Deployment: Heroku, Google Cloud Platform (GCP)

Databases: MySQL

Professional Experience

Technical Lead | HCL Technology | Dec 2021 – Present

Project: Data Warehousing Migration to GCP (Google LLC)

- Led the full-stack development for a multi-step data warehousing migration solution to Google Cloud, automating translation, schema migration, and data validation to reduce client effort and time.
- Designed and built dynamic front-end forms using **React.js, HTML5, and CSS3**.
- Developed robust backend REST APIs with **Golang and Gin** to manage data processing pipelines and API integrations.
- Leveraged **Go's concurrency patterns** to build efficient, scalable solutions and ensure high performance.

Sr. Software Developer | MSR Travelers LLP | Oct 2019 – Dec 2021

Project: TrackEx

- Developed an advanced travel-planning and expense reporting system for corporate clients, integrating with company finance systems.
- Created responsive web forms using **Angular 1.0/2.0/4.0 and TypeScript**.
- Built a comprehensive **Authentication and Authorization module** with role-based access to securely manage user credentials and permissions.
- Utilized **Bootstrap** to design user-friendly grids and layouts for displaying a wide range of information.

Associate Software Developer | DataMatics | Dec 2018 – Oct 2019

Project: Ingersoll Rand - Tracer® SC

- Contributed to the development of a web-based Building Automation System (BAS) for facility management.
- Configured the SC controller and developed user interfaces using **AngularJS and Dojo.js**.
- Implemented a robust role-based access control system for site security and administration.

Software Developer | Fluxes Soft Services | Jan 2018 – Dec 2018

Project: Aditya Birla Payments Bank - NACH System

- Developed a web-based solution for the National Automated Clearing House (NACH) to facilitate high-volume, electronic bank transactions.
- Designed and implemented secure web forms using **Angular 1.0/2.0/4.0** to handle bulk payments and collections.
- Created an administration tool to manage user roles, logins, and authentication for enhanced site security.

Software Developer | Healtho5 | Sep 2016 – Jan 2018

Project: Healtho5 Solutions

- Contributed to the development of a social and mobile healthcare engagement platform for hospitals.
- Designed and implemented user interfaces with **AngularJS and HTML5**.
- Built and consumed REST APIs to facilitate patient engagement via a branded hospital app, supporting features like appointment booking and lab services.

Jr. Mean Stack Developer | Rubhu Digital Media solutions | Mar 2014 – Aug 2016

Project: Financial Legal Agreements Management System 1.0

- Worked on a system to track and manage important terms in legal and financial agreements.
- Designed web forms using **AngularJS and HTML5** for data entry and user interaction.

- Developed and optimized **MongoDB queries** to efficiently retrieve and manage data for business requirements.
- Implemented an access control module to manage user permissions and access rights.

Educational Background

Bachelor of Technology, Information Technology (IT)
